

01 Relevant Technical Experience

Hands-on government IT support that translates requirements into working solutions.

Clinical Data Systems

Built databases for the Walter Reed Traumatic Brain Injury program supporting roughly 65,000 records, and created scheduling databases for gastroenterology clinic operations.

Endpoint Procurement & Deployment

Outfitted 300 wounded warriors with computers, phones, and printers; managed 500+ computers; gathered requirements and recommended equipment leadership purchased for refresh efforts.

Automation & Self-Service

Created scripts for account creation, provisioning, user transfers, and repeatable support tasks, plus a self-service app for backups, printer installs, common fixes, and resource links.

ATO & Vulnerability Readiness

Supported STIG compliance, vulnerability remediation, endpoint readiness, printer support, VTC support, and audit preparation for an environment that passed ATO review.

02 Company Overview

Emerging small business. Owner-led technical depth.

Tech Bridge Supply LLC bridges the gap between mission needs and dependable technology support. The company is built around practical experience in military medical IT environments where accuracy, documentation, security posture, and uptime matter.

We support procurement teams by helping clarify requirements, compare options, source appropriate hardware and software, and communicate in a way contracting and program offices can use.

03 Core Competencies

Practical technology support from sourcing through readiness.

Hardware Sourcing

Laptops, workstations, peripherals, carts, printers, and refresh equipment.

Software Solutions

Licensing support, workflow tools, self-service apps, and productivity enablement.

Database Support

Clinical data tracking, scheduling systems, reporting, and operational records.

Automation Scripting

PowerShell-driven account provisioning, transfers, repeatable fixes, and error reduction.

Cybersecurity Readiness

STIG alignment, vulnerability remediation, endpoint posture, and ATO preparation.

Technical Translation

Requirement gathering, product comparison, recommendations, and clear documentation.
